

Errata for §170.304 (a) Computerized provider order entry

The purpose of this document is to record known technical corrections to v1.1 of the Computerized Provider Order Entry test procedure. Errata for other test procedures are located in separate documents. Each erratum entry includes the following information:

- Entry number
- The date the errata was added to the document
- The test procedure version and date published
- The test procedure section
- A description of the correction
- The text prior to the revision and the revised text

1. Technical Correction to Informative Test Description

Date: December 3, 2010

TP Version: Version 1.1, September 24, 2010

TP Section: Informative Test Description, page 2

Description: Fixed typo in informative test description.

Text Prior to Revision:

The test procedure is not prescriptive about the method used to modify the problem list. For example, modifying an order does not require modifying an existing instance of an order. Modification may be accomplished through discontinuing/canceling an existing order and entering a new order.

Revised Text:

The test procedure is not prescriptive about the method used to modify **an order**. For example, modifying an order does not require modifying an existing instance of an order. Modification may be accomplished through discontinuing/canceling an existing order and entering a new order.
